

TEMPORARY DISTANCE EDUCATION OVERVIEW

In order to comply with the NJ State Governor's Executive Order No. 155 and best facilitate social distancing, Shore Beauty School's ("Shore") will be offering Temporary Distance Education to its students through the duration of the COVID-19 pandemic. The following provides an overview of Shore's Temporary Distance Education Curricula, which is delivered through a hybrid educational model for each of the following programs as described below:

- Barbering – 50% distance online and 50% classroom-based
- Cosmetology & Hairstyling - 50% distance online and 50% classroom-based
- Skin Care Specialty - 50% distance online and 50% classroom-based
- Teacher Training - 50% distance online and 50% classroom-based
- Manicuring - 75% distance online and 25% classroom-based

Before enrolling in a Shore Hybrid Educational Program, students should consider the following hardware, network and software requirements required to successfully complete any of the above programs:

- Hardware: Personal computer, laptop, tablet or smartphone with Windows 10, Apple or Android based operating systems (Note: while distance education may be delivered through a smartphone, Shore recommends alternative devices with larger screens). Hardware must be equipped with two-way video cameras and microphones.
- Internet Access: Reliable, high-speed broadband network. Students should be prepared to pay additional Internet data charges (from their Internet service providers) associated with online data streamed learning (Note: Comcast offers free broadband services, to those who qualify, during the COVID pandemic).
- Software requirements are Milady MindTap (access code provided by Shore as part of student kit) and Zoom conferencing software, which may be downloaded from Zoom.com

Temporary Distance Education is anticipated to continue through the duration of the Executive Order No. 155 mandate and will be subject to the continued approvals of the NJ State Board of Cosmetology and Hairstyling, the National Accrediting Commission of Career Arts & Sciences and the U.S. Department of Education. Shore will revert back to 100% classroom-based education when such orders and approvals are reversed.
